

Faculty of Medical Sciences
University of Sri Jayewardenepura

Prepared based on the University curricular policies numbered 14 & 15 approved by council

Policy Title: Policy on Programme/ Curricular Designing, Implementation, Monitoring, Review and Revision

Policy Number: 03

Functional Area: Academic

Effective and Revised Dates: 28/04/2022

Approving Authority: The Council, University of Sri Jayewardenepura

Administrative Responsibility: Heads of Departments, Dean of the Faculty, Faculty Boards, Curriculum Development Committee, Senate

Rationale & Purpose –

This policy covers protocol and other administrative matters related to the process of curriculum development, implementation, monitoring, review and revisions in the Faculty of Medical Sciences. The process of curriculum development is primarily two-fold; major and minor developments/ revisions. Major revisions are conducted in regular intervals (Minimum 5 years) in order to incorporate contemporary trends in benchmarking, accreditation and to adhere to new/changing qualification frameworks. This should be a collaborative exercise which is conducted with the participation of all stakeholders. Comparatively, minor revisions are done whenever necessary to facilitate urgent requirements and requests submitted by individuals or departments relating to specific programmes. The Curriculum Development Committee with the assistance of the appointed Curricular Revision Subcommittee of the faculty holds the key responsibility of organizing, administrating and assisting the faculty with all matters and issues relating to curriculum development. The Internal Quality Assurance Cell of the faculty is entrusted with the responsibility of monitoring the process of curriculum review in order to ensure that matters related to quality assurance are adequately adhered to in this process.

Scope – Academic staff members, Administrative staff, Undergraduate students,

Policy Statement –

- Curriculum will be delivered as modules, streams, and strands integrated both vertically and horizontally.
- Designing/ revising a curriculum or a programme will be the shared responsibility of all the staff members who shall collaborate to develop and deliver the curriculum or the programme.
- The programme or curriculum should comply with the latest/current qualification frameworks, (SLQF) Benchmark Statement for Medicine and professional standards (Minimum Standards document) of the Sri Lanka Medical Council.
- Curriculum/programme will be developed taking into account the Institutional Vision and Mission, National goals and objectives, UGC guidelines, desired graduate attributes (e.g. developing students core values and critical thinking, so that they are able to contribute meaningfully and creatively to society, meet emerging needs in the field of medicine, occupational/ professional requirements, stakeholder inputs, university policies, educational and other technological advancements while taking into consideration the available resources.
- The curriculum/ programme design and development will use outcome-based and learner-centered approaches. Graduate Profile and Programme Outcomes will form the basis for selecting the content, learning resources, learning activities, and determining the learning outcomes, and assessment approaches for each course offered under the respective programme.
- Learning activities and assessment methods should align with, program and/or course learning outcomes taking into account the guidelines provided in qualification frameworks and Subject Benchmark Statements.
- Issues of gender, cultural and social diversity, equality, social, justice ethical values and sustainability are integrated into the curriculum where relevant.
- Clinical clerkships or other such opportunities which provide exposure to the world of work should be incorporated into the curriculum at appropriate times in the delivery of the programme. Opportunities to use and explore the most contemporary aspects of modern technology shall also be made available in the process of designing and delivering the curriculum.
- The program/curriculum should align with the institutional Mission and Vision.
- Key factors relating to the administration of the degree programme such as minimum qualifications for enrollment, different windows of enrolment to the degree programme/ information on compulsory, optional and elective courses as well as pre-requisites to follow particular courses should be clearly stated.
- Curriculum will be monitored through stakeholder feedback including end of module student feedback, and external examiner feedback which will be discussed at the relevant academic committee meetings held at the end of the module/ assessment
- Any change which is recommended for inclusion in the revisions, should be substantiated by evidence (supported by feed-back or results of action research conducted)
- Opportunities should be made available for credit transfer among different degree programmes/ streams of study as well as faculties and universities both local and international depending on the programme requirements.

Definitions –

New Programme: A programme which has not been offered before in any faculty or is a modified version of a programme that is no longer offered by any faculty whose purpose, outcomes and field of study, mode or site of delivery has been considerably changed.

Outcomes: based education: Outcome-based education is an approach to education in which decisions about the curriculum are driven by the exit learning outcomes that the students should display at the end of the study programme.

Study Programme: A purposefully structured set of learning experiences that leads to a qualification. Programmes may be disciplined-based, professional, career-focused, or trans, inter-or multi disciplinary in nature. A programme has recognized entry and exit points. All taught higher education programmes should have core and elective elements. This requirement is optional for research-based programmes.

Learning outcomes: High quality, culminating demonstrations of significant learning in context

Credits: The value assigned to a given number of notional hours of learning which may be accumulated until conditions have been met for the award of a module/course/programme/qualification.
